Dzmitry Lapeta

Senior Front-End Developer

Poland, Gdańsk | dzmitrylapeta@gmail.com | https://www.linkedin.com/in/dimalapeto | https://github.com/dimalapeto

Summary

Senior Front-End Developer with 6+ years of experience building modern, responsive web applications using React, Next.js, and Node.js. Successfully led front-end development from scratch in startup and enterprise environments. Strong advocate of performance optimization, clean code, and Agile practices. Proven leadership in mentoring, team coordination, and product-focused development. Eager to contribute to high-impact, user-centric solutions.

Technical Skills

• Front-End: HTML5, CSS3 (SASS/SCSS), JavaScript (ES6+), TypeScript, React (Hooks), Next.js, Redux (Redux-Saga)
• Back-End: Node.js (Express.js), Ruby on Rails (basic)
• Testing: Jest, Enzyme, React Testing Library
• Build/CI/CD: Webpack, npm/Yarn, Docker, Jenkins, GitLab CI
• Databases: PostgreSQL
• Tools: GitHub, GitLab, Jira, Redmine, Sentry, SonarQube, Kibana, Dynatrace, ManageIQ, Foreman, MEND
• Languages: English – Intermediate (B1–B2), Polish – Basic

Strengths

● Self-motivated and proactive, continually learning new technologies and adapting quickly.
● Team-oriented professional who fosters a productive, positive team environment.
● Proven ability to work independently and make effective decisions with minimal supervision.
● Initiated and implemented process improvements across projects, boosting team efficiency and code quality.
● Experienced in collaborating within globally distributed teams and communicating directly with stakeholders.
● Deep knowledge of Agile (Scrum) methodologies – fully versed in ceremonies and best practices.
● Actively mentors junior developers, facilitating onboarding and knowledge sharing.

Experience

Senior Front-End Developer – AventusIT (Aventus Group), Poland   Mar 2023 – Present

Project: credito365.mx and ultradinero.mx – AI-powered online consumer lending platform.

● Sole Front-End Developer building the platform from scratch using React 18, Next.js, and Redux.
● Developed registration, credit application, user account, and CRM modules.
● Integrated third-party services to enhance data collection and accuracy.
● Collaborated with stakeholders to refine business logic and product features.
● Analyzed fraud patterns and implemented effective countermeasures.

Senior Front-End Developer – SAP SE, Remote   Nov 2021 – Feb 2023

Project: BTP Citymap – internal observability tool for SAP Business Technology Platform.

- Developed core UI components (SPA, Redux store, forms, telemetry visualization).
- Integrated Dynatrace, Kibana, and ElasticSearch telemetry into frontend stack.
- Participated in architectural decisions and micro-frontend migration using Luigi.
- Led onboarding for new team members, mentored developers, and coordinated FE work.
- Contributed to documentation and agile ceremonies (sprint planning, demos, retrospectives).

Front-End Developer – IBM, Remote   Aug 2020 – Oct 2021

Project: Your Career@IBM – career development platform for IBM employees.

- Implemented 25% of production features and ensured high code quality with unit tests.
- Performed daily code reviews and bug fixes across modules to maintain consistency.
- Cooperated closely with backend and design teams to deliver functional solutions.
- Presented progress to stakeholders during regular showcases.

Front-End Developer – IBA Group, Belarus   Jul 2019 – Jul 2020

Project: ICDC.io – hybrid cloud delivery platform for enterprise clients.

- Developed UI for new microservices from scratch using React and Redux.
- Implemented backend/frontend full-cycle tasks; integrated IBM Power system into cloud stack.
- Improved cross-team integration and supported post-production delivery.
